

Varad Singhal

Chennai, TamilNadu — +91-7805841826 — varadsinghal1526@gmail.com — [LinkedIn](#) — [Portfolio](#)

Professional Summary

Pre-final year B.Tech Computer Science and Engineering and B.Tech Honors in Financial Technology student, with strong interest in fintech, digital payments, banking systems, and cloud-based financial applications. Skilled in Flutter, AWS, REST API development, and IoT integration, with hands-on experience building scalable mobile and backend solutions through internships and real-world projects.

Education

SRM Institute of Science and Technology, Chennai *Expected June 2028*
B.Tech in Computer Science and Engineering **CGPA: 9.94**

SRM Institute of Science and Technology, Chennai *Expected December 2027*
B.Tech (Honors) in Financial Technology **CGPA: 10.00**

Awarded Top Achiever consecutively in First and Second Year by the Department of Computing Technologies.

Technical Skills

Programming Languages	Java, Dart, Python, C/C++, SQL
Mobile Development	Flutter, Firebase, REST API Integration
Cloud & DevOps	AWS Lambda, Amazon RDS, Amazon S3, AWS Systems Manager (SSM), CI/CD, Git
Backend Development	Node.js, API Development, Database Design
IoT & Embedded Systems	ESP32, Arduino, Sensors, MQTT, Embedded Systems
Soft Skills	Problem Solving, Team Collaboration, Communication, Time Management

Experience

Application Developer Intern *March 2026 – Present*
Printellect Innovations *Chennai, TN*

- Supported deployment and monitoring of production mobile applications used for IoT-enabled printing workflows.
- Improved reliability of real-time device communication by optimizing data synchronization between connected hardware and cloud services.

Application Developer Intern *June 2026 – Present*
Tellwell Digital Services *Remote*

- Developed and shipped core features for a Flutter-based mobile application, contributing to the end-to-end product release cycle.
- Architected and managed AWS backend infrastructure using Lambda, RDS, S3, and SSM to support scalable and secure application services.
- Reduced manual configuration effort by centralizing environment and secret management through AWS Systems Manager.

Projects

- Gigkavach** – AI-powered fintech platform providing parametric income protection for delivery gig workers by automatically triggering payouts based on weather, AQI, and flood-disruption APIs, eliminating manual claims processing and enabling faster financial assistance.
- Sephela** – Enterprise cybersecurity platform that performs GenAI-based analysis and risk scoring of Android APKs for banking and financial-security teams using Python and cloud-based threat-detection workflows.
- BusMitra** – Real-time public transport tracking platform built with Flutter and backend analytics services, providing live location sharing and ETA prediction for improved fleet visibility and commuter experience.

Achievements & Leadership

- Smart India Hackathon 2025 Nationalist** – Qualified among the top teams at the national level.
- CyberShield by BOI Finalist** – Attended National Finals organised by Bank of India and IIT Hyderabad
- Certifications:** IBM Android & iOS Application Developer, Salesforce Agentforce Specialist, Oracle Agentic AI Foundations Associate.
- Technical Team Head:** Google Developer Groups, Qwiklab Developer Club, Microsoft Student Ambassador, Coding Ninjas 10X.
