## Objective

Software Engineer with 2+ years of experience across mobile application development, AWS-based backend systems, and IoT solutions, seeking a part-time role building scalable applications, connected-device integrations, and efficient cloud backends. Passionate about creating reliable, high-performance systems that bridge software and hardware to deliver impactful technology solutions.

## Education

### SRM Institute of Science and Technology

Chennai, TN

B.Tech, Computer Science and Engineering

Expected 2028

Current CGPA: 9.94

B.Tech Honors in Financial Technology

Expected 2027

Current CGPA: 10.00

Awarded Top Achiever (First Year) by the Department of Computing Technologies

## Skills

|                  |                                                                     |
|------------------|---------------------------------------------------------------------|
| Languages        | Java, Dart, Python, C/C++, SQL                                      |
| Cloud & DevOps   | AWS Lambda, RDS, S3, SSM, Amazon Bedrock (Titan V2), Git            |
| Frameworks/Tools | Flutter, React, Node.js, Firebase, REST APIs                        |
| IoT Technologies | ESP32, Arduino, Sensors, MQTT, Embedded Systems                     |
| Soft Skills      | Problem Solving, Team Collaboration, Communication, Time Management |

## Experience

### Application Developer Intern

March 2026 – Present

Printellect Innovations

Chennai, TN

- Managed deployments and system monitoring while integrating IoT devices into the company's product pipeline [Google Play Store](#)

### Application Developer Intern

June 2026 – Present

Tellwell Digital Services

Remote

- Developed and shipped Tellwell's mobile application, building core user-facing features end-to-end.
- Set up and managed AWS backend infrastructure, including Lambda functions, RDS databases, S3 storage, and SSM for configuration and secrets management.

## Projects

- Sephela** – Enterprise platform for GenAI-based automated analysis and risk scoring of fraudulent Android APKs — built for banking cybersecurity teams
- BusMitra** – Real-time bus tracking system combining a Flutter mobile app with a backend analytics platform to share live bus locations and predict arrival times, improving public transport reliability and fleet monitoring for authorities. [Try it out](#)
- Gigkavach** – Built an AI-powered mobile platform delivering parametric income insurance and earnings intelligence for food-delivery gig workers, auto-triggering disruption payouts (rain, AQI, flooding) via real-time API monitoring with zero manual claims filing. [Try it out](#)

## Achievements and Campus Involvement

- First Place, [Innofusion '26](#) – hackathon organized by the DSBS Department
- First Place, [PokeVerse Ideathon](#) – organized by SRM ACM SIGKDD
- [IBM Android and iOS Application Developer](#) Certification
- [Salesforce Certified Agentforce Specialist](#)
- [Oracle Agentic AI Certified Foundations Associate](#)
- Technical Team Member – Google Developer Groups, Qwiklab Developer Club, Microsoft Student Ambassador, Coding Ninjas 10X
