OBJECTIVE

Software Engineer with 2+ years of experience in mobile application development, backend systems, and IoT solutions, seeking a part-time role where I can design and build scalable applications, integrate connected devices, and develop efficient backend services. Passionate about creating reliable, high-performance systems that bridge software and hardware to deliver innovative and impactful technology solutions.

EDUCATION

SRM Institute of Science and Technology

B.Tech Computer Science and Engineering

Honors in Financial Technology

Expected 2028

Current CGPA: 9.92

Expected 2027

Awarded Top Achiever in first year by Department of Computing Technologies

SKILLS

Technical Skills	Java, Dart, Python, C/C++, SQL
Frameworks/Tools	Flutter, React, Node.js, Firebase, REST APIs, Git
IoT Technologies	ESP32, Arduino, Sensors, MQTT, Embedded Systems
Soft Skills	Problem Solving, Team Collaboration, Communication, Time Management

EXPERIENCE

Application Developer Intern

Printellect Innovations

March 2026 - Present

Chennai, TN

- Stipend-based internship involving deployment management, system monitoring, and integration of IoT devices.

Full Stack Intern

Turn2Law Pvt Ltd

August 2025 - Feb 2026

Chennai, TN

- Designed and implemented backend functionality for AI systems while integrating UI/UX for frontend interfaces.

PROJECTS

Echo Developed an AI-driven system that analyzes user feedback from a community platform and identifies feature requests and issues. The agent autonomously generates code suggestions and opens Pull Requests on GitHub to accelerate product improvement. ([Try it here](#))

BusMitra Developed a real-time bus tracking system using Flutter mobile apps and a backend analytics platform to share live bus locations and predict arrival times. The solution improves public transport reliability and commuter convenience by providing accurate ETA predictions and fleet monitoring for authorities

SabotageDev Developed a real-time multiplayer coding game using Flutter and PartyKit, featuring live collaborative code synchronization and an interactive social deduction gameplay loop.

ACHIEVEMENTS AND CAMPUS INVOLVEMENT

- Stood First at [Innofusion 26](#), hackathon organised by DSBS Department, First at [PokeVerse Ideathon](#), organised by SRM ACM SIGKDD, Global Certification including [IBM Android and iOS Application Developer](#) and [Salesforce Certified Agentforce Specialist](#).
- Part of Technical Team in Google Developer Groups, Qwiklab Developer Club, Microsoft Student Ambassador, Coding Ninjas 10X.
